Opinion: Limited digital infrastructure in rural regions is a major impediment to economic development

Thirty years into democracy, South Africa finds itself at a technological crossroads, caught between the aspirational promise of digital democracy and the harsh realities of life for her citizens. This is particularly the case for those in rural regions running small, medium, and micro-sized enterprises (SMMEs). Despite the significance of their 34% contribution to SA's Gross Domestic Product (GDP), efforts to enable their leverage of digital technology and grow their contribution to the economy are often underwhelming. Bringing SMMEs fully into the digital economy is critical for the future of South Africa and to realise those aspirational promises..... [Read More](#)
